

FRAMES OF LIFE

EDITED BY CHIARA BARDELLI NONINO

A PARENTAL PORTFOLIO

A father shapes his child's view of the world, wherever in the world that may be. Here, seven photographers from *L'Uomo Vogue's* global creative community showcase images that crystallise facets of fatherhood which are specific to their cultural context. Because while fatherhood might be a common experience, every example of it is also unique – particular to time, place and personality.

ANETA BARTOS
POLAND

"Growing up in patriarchal Poland, my dad was both mother and father to me: within our household the gender roles were blurred. As a (single) father he represented stability and strength, but what made him special is that he was nurturing and gentle as well, never shying away from his feminine side. In these images I recreate my childhood memories while inserting myself as an adult woman."
